

# James W. Pennebaker

January, 2008

Department of Psychology  
University of Texas at Austin  
1 University Station A8000  
Austin, TX 78712  
512-232-2781  
E-mail address: Pennebaker@mail.utexas.edu

## Education

1973-1977 University of Texas, Austin, Texas, Ph.D. in psychology  
1970-1972 Eckerd College, St. Petersburg, Florida, B.A. with honors  
1968-1970 University of Arizona, Tucson, Arizona

## Positions

2005-present Chair, Department of Psychology, University of Texas at Austin  
2005-present International Professor of Psychology, University of Central Lancashire, UK  
2004-2005 Associate Chair, Department of Psychology  
1997-present Professor of Psychology, University of Texas, Austin  
1995-1997 Chair, Department of Psychology, Southern Methodist University  
1987-1997 Professor of Psychology, Southern Methodist University  
1983-1987 Associate Professor, Department of Psychology, Southern Methodist University  
1982-1983 Polygraph unit instructor, Federal Bureau of Investigation, Quantico, Virginia  
1977-1983 Assistant Professor, Department of Psychology, University of Virginia,  
Charlottesville, Virginia

## Honors

2008 Dads' Association Centennial Teaching Fellowship  
2007 Raymond Dickson Centennial Endowed Teaching Fellowship Award  
2006-present ISI HighlyCited.com selection for being among the most cited researchers in  
Psychology/Psychiatry  
2005-present B. P. Bush Regents Professor of Liberal Arts  
2004 Hero of Midland, Texas, sponsored by the Midland Independent School District  
2003 Blair Justice Inaugural Lecturer Award, University of Texas School of Public Health  
2002 Outstanding Contributions to Health Psychology (APA Division 38)  
2002 Brittingham Visiting Scholar, University of Wisconsin  
2001 Alpha Lambda Delta/Phi Eta Sigma Outstanding Professor Award  
2000 President's Associates Teaching Award, University of Texas  
1998 Visiting Professor, Department of Psychology, University of Bari, Italy  
1995 Pavlovian Investigator Award, The Pavlovian Society  
1993 D.H.C. (Docteur Honoris Causa -- honorary doctorate degree), Catholic University of  
Louvain, Louvain-La-Neuve, Belgium.  
1990 Visiting Professor, Division of Medical Psychology, University of Ulm, Germany  
1989 Outstanding Researcher Award, Sigma Xi, Southern Methodist University  
1989 Hilgard Visiting Professor, Department of Psychology, Stanford University

### Research Grants

2007-2010	Army Research Institute, Language and social dynamics
2007-2008	DOD and CIFA, Viewing text through English and Arabic eyes
2005-2007	NSF workshop on language and deception
2005-2006	U.S. Army, Timing of expressive writing to maximize coping
2004-2007	Binational Science Foundation, Math models of language and personality (coPI)
2000-2007	NIMH Grant, Interpersonal disclosure processes and health
1996-2000	NIMH Grant, Interpersonal disclosure processes and health
1994-1997	NSF Grant, Disclosure, language, and health
1991-1994	NSF Grant, Cognition, disclosure and health
1989-1991	NSF grant, The psychological consequences of the 1989 California earthquake
1987-1989	NSF grant, Inhibition, disclosing, and health
1984-1987	NIH grant, Perception of physical symptoms and blood pressure
1981-1984	NIH grant, Symptoms and blood glucose: Evaluation and utilization, with D.J. Cox
1980-1981	NSF grant, Psychological impact of Mt. St. Helens Volcano, with Darren Newtonson
1977-1978	NIH Biomedical Support Grant, University of Virginia

### Teaching Experience

Undergraduate	Introductory Psychology, Health Psychology, Methodology, Social Psychology, Social Psychology of Religion, Social and Political Institutions (1854-present)
Graduate	Language and Personality, Social Psychology of Language, Stress and Psychosomatics, Methodology, Social Psychology, Eating Behavior and Disorders, Social Physics

### Ongoing Research Projects

1. Most of my current research deals with the nature of language and social processes. How do the words we use reflect our underlying feelings, thoughts, personality, and behavioral tendencies? In answering this question, we have developed a text analysis program, LIWC, that has allowed us to analyze language use on a word-by-word level for any text – whether a book, poem, song, webpage, or natural conversation. We are finding that the “junk words” people use – articles, pronouns, prepositions – are powerful markers of their linguistic styles and these styles are often linked to other aspects of their lives.

2. I am continuing some of my earlier work with disclosure, inhibition, and psychosomatic disease. The goal of the project is to develop and test the idea that failure to confide a traumatic experience is associated with physiological stress. The stress of not confiding (i.e., inhibition) is exacerbated by increased ruminations about the event. The cumulative effects of inhibition and rumination increase the probability of disease over time. Requiring individuals to confide or disclose upsetting experiences reduces specific autonomic levels and, over time, disease rates. Recent work focuses on how translating emotional experiences into language affects how people naturally interact with others.

3. A longstanding interest of mine has been to understand how individuals perceive physical symptoms, moods, and physiological change. Studies deal with the relative contributions of internal physiological activity compared with situational cues in influencing individuals' self-reports and more objective indicators of physical symptoms, emotions, and behaviors. Recent work deals with sex differences in the perceptions of internal versus external information.
